

(Shown at 100%)

Directions

This design is perfect for creating a cheery towel for your kitchen. It can also be used for a variety of craft projects such as appliqué, punchneedle embroidery, painting, and paper crafts.

Depending on the project, you may need to transfer the design on the right side of the fabric (for embroidery, painting, etc.), or on the wrong side (for punchneedle embroidery).

Direct Tracing onto Right

Side: Tape the pattern (right side towards you) onto a sunny window, light box, or other light source. Position the fabric right side up over the pattern, then trace onto the fabric using an ordinary pencil or marking pen.

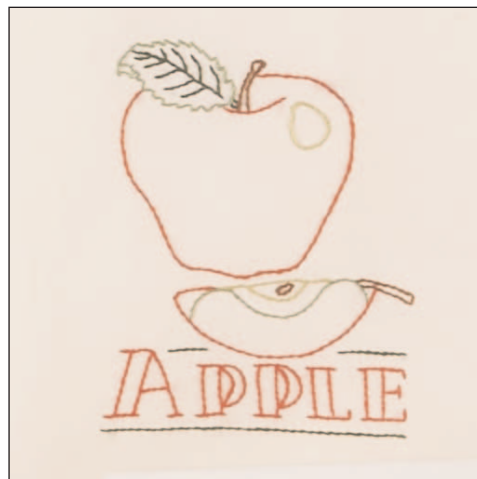

Transfer Pencil onto Wrong

Side: Lay tracing paper over the pattern and trace with an ordinary pencil. Turn tracing paper over and retrace the pattern using an iron-on transfer pencil. Apply this new transfer pattern to the wrong side of the fabric.
