

Voice Recorded Greeting Card

Herrschners[®]

What You'll Need

5" x 7" tri-fold card with 3¼" x 4¼" rectangular opening, White Speakin' Up Voice Recorder
Birthday rub-on transfers
One 8¼" x 11" sheet each of Creative Collection™ Astrobrights® Glisten™ Pearlescent Cardstock in Lunar Blue™, Solar Yellow™, and Venus Violet™
Scrapbook Adhesives™ E-Z Runner™ Adhesive Dispenser
Scrapbook Adhesive E-Z Squares™ Adhesive Dispenser
Hobby Knife
Ruler
Cutting Mat

Instructions

Trim each color paper to 5" x 7" (the size of the folded card). Open the card all the way so the rectangular opening is in the center and the inside of the card is facing up. Using the E-Z Runner adhesive dispenser, apply adhesive to the righthand flap. With glisten side up, lay the Lunar Blue paper on the adhesive, pressing and smoothing. Attach the Venus Violet paper to left-side flap in the same manner. Close the card.

With the front of the card facing up, use the E-Z Runner adhesive dispenser to apply adhesive around the rectangular opening. Attach the Solar Yellow paper, glisten side up, to the front of the card, pressing and smoothing. Turn card over and open it up all the way on a cutting mat. Using a ruler and hobby knife, cut along the window of the card. Remove cutout rectangle.

Cut out the birthday cake transfer from transfer sheet. Position the transfer on the front side of the recorder (don't worry if some of the candles overlap the speaker holes). Once the transfer is positioned, use a craft stick to begin rubbing the transfer. This requires a bit of pressure and works best if you go over the area a couple of times. Work your way across the entire transfer. Once the entire transfer has been worked, begin at one corner and slowly pull back the transfer sheet. If it sticks, go back over the area, rubbing the transfer with the craft stick. Work slowly and gently. Once you have the recorder decorated, record a personal message following the manufacturer's instructions.

Select a greeting from the transfer sheet, cut out, and position on the card, following the same method used for applying the transfer to the recorder. Apply additional rub-on transfer designs to the front of the card as desired.

Using the E-Z Squares adhesive dispenser, apply adhesive to all corners on the back of the recorder. Center the recorder in the window and attach it to the Venus Violet flap, pressing down firmly to secure. Open the card and apply adhesive around the rectangular opening. Close the left panel (with the recorder attached) onto the center panel and press firmly. The card now opens as a single-fold rather than a tri-fold card.
