Instructions

Using the Waves Fold-It Pinwheel Punch and with the flat (non-glisten) side of the paper facing up, punch out the design six times according to manufacturer's instructions. Fold so that the glisten sides are folded together. Secure the punched pieces with a large circle brad in the center. Use a foam brush to add shading with blue ink around the petal edges. Place small dots of glitter glue around the curved edge of each small petal. Allow glue to dry. Attach the white eyelet to the top of one large petal and thread one strand of metallic braid through the eyelet for a hanging loop.
